DETAILED ACTION

This office action is in response to the election filed 12/9/02.

The previous restriction requirement is withdrawn since the claims are directed to related inventions rather than distinct species.

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 49-59, drawn to a method of making a non-volatile semiconductor device, classified in class 438, subclass 261.
- II. Claims 60-71, drawn to a method for operating a non-volatile semiconductor device, classified in class 257, subclass 324.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as process of making and process of using the product. The use as claimed can be practiced with a materially different product than the product formed by the method of making as claimed. For example, the use as claimed can be practiced with a product that comprises an equivalent oxide thickness of greater than 200 angstroms.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Art Unit: 2822

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
